

feet, why should you be able to do that? Obviously we have counties of good...

PRESIDENT ROBAK: One minute.

SENATOR KRISTENSEN: ...size and that there is at least a few miles for that to take place and that that chase, if it's going to extend for a longer period of time, there will be a more...there will be a greater likelihood there will be assistance to do that with.

SENATOR CHAMBERS: Madam President, members of the Legislature, the more Senator Kristensen answers questions, the more ridiculous you can see this is and how illogical. If you don't want them to try to get away by running into one county, you say but it's all right to let them get away if they can make it successfully through that adjoining county. Run them through there and risk those people and if they succeed in getting through that one, then they're home free. That is worse than the current situation.

PRESIDENT ROBAK: Thank you, Senator Chambers. The Chair recognizes Senator Witek. Senator Witek.

SENATOR WITEK: Madam Chairman, members of the body, I just had a question and I'm not sure how much it would affect Senator Chambers' amendments, but it certainly would affect Senator Kristensen's bill. And, Senator Chambers, maybe you've thought about it or Senator Kristensen, either one can answer it. We have a lot of SIDs in my district. The SIDs, if you're familiar with them, the Sanitary Improvement Districts. My SID is considered county, the SIDs are considered county, is totally surrounded by city and the people who respond to ours are the sheriff that respond to our calls. Our calls go into the sheriff's department. Although totally surrounded by city, on our calls I'm wondering if this bill would have the opportunity, you're kind of talking about chases into other counties and chases and everything and I guess I'm not thinking of a chase per se, I'm thinking about a response time to a certain incident that would be even a traffic violation, maybe somebody speeding down the hill in our SID or even injuring a child when they do something like that because the school is right there. I would want the nearest officer, and I would assume that's what they can do now although I'm not sure they have the right or the statutory authority to do so, I think they do that anyway. But
